DETAILED ACTION

Claim Objections

1. Claim 47 objected to because of the following informalities: In line 2, claddinglayer appears and should be cladding layer. Appropriate correction is required.
2. The preliminary amendment was provided with insufficient margins on the top of the page and must be resubmitted with proper margins.
3. Page 24 of the specification is missing and must be supplied.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
5. Claim 46 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
6. Claim 46, which depends on claim 38 shows the limitation of the active layer being a quantum well but claim 38 shows the active layer as being a strained layer. The specification does not provide support for a strained quantum well and treats the two features as being exclusive. Correction is required.
7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2814

8. Claims 34, 35, 39 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

9. Claim 34 refers to a third cladding layer but there is no second cladding layer. The claim also refers to a second guide layer but there is no first guide layer.

10. Claim 35 depends on claim 33 and refers to a guide layer but there is no guide layer in claim 33. The claim also refers to "said first cladding layer" but claim 33 refer to "a" cladding layer.

11. Claim 39 refers to the active layer as being sandwiched between a clad layer inside the v-groove and a clad layer outside the v-groove. How is that possible?

Double Patenting

12. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

13. Claims 28 - 54 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 - 16 of U.S. Patent No. 6,265,733.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the same structural features are claimed in both.
